

Il faut sauver le robot Susan (1)

Scripts Asimov

The image displays six Scratch scripts arranged in a 3x2 grid, designed to control the Asimov robot. Each script is a sequence of blocks:

- Script 1 (Top Left):** Triggered by a green flag click, it sets the speed to 30 and then turns all motors on at that speed.
- Script 2 (Top Right):** Triggered by the right arrow key, it turns the left motor on at the current speed and the right motor off.
- Script 3 (Middle Left):** Triggered by the up arrow key, it increases the speed by 10 and then turns all motors on at the new speed.
- Script 4 (Middle Right):** Triggered by the left arrow key, it turns the left motor off and the right motor on at the current speed.
- Script 5 (Bottom Left):** Triggered by the down arrow key, it decreases the speed by 10 and then turns all motors on at the new speed.
- Script 6 (Bottom Right):** Triggered by the spacebar, it stops all motors.
